

### Sample State

The screenshot displays the SENAITE web application interface. At the top, a browser window shows the URL <https://senait-server.bhp.org.bw/clients/client-11/exportdata>. The application header includes a logo for 'BOTSWANA HARVARD AIDS INSTITUTE PARTNERSHIP FOR HIV RESEARCH AND EDUCATION' and a user profile 'jlegbedze'. The main navigation bar contains links: Home, Clients, Tshilo Dikotla, Batches, Samples, Sample Points, Analysis Profiles, Sample Templates, Analysis Specifications, Orders, Edit, Contacts, Analysis Reports, Couriers, and Data Export. The 'Data Export' section is active, showing 'Analyses related exports'. Under the 'Samples' section, there is a form to 'Generate sample data export for client'. The form includes 'Date Requested' (From and to), 'Sample state' (a dropdown menu with options like Sampled, To be sampled, At reception, etc.), and 'Output format' (a dropdown menu set to EXCEL). An 'Export Data' button is also present. The footer shows '© 2017-2019 SENAITE' and 'SENAITE is powered by'.
