Description			
<p>1. For the Maternal Off Study form - add "Mother did not complete ANV1 (1010) visit" as an OFF STUDY reason, and make this reason NOT count against accrual</p> <p>2. Make the current OFF STUDY reason which is listed as "Maternal seroconversion after 33 wks GA" one of the reasons that do NOT count against accrual.</p>			

History

#1 - 24/01/2018 12:18 - Anonymous

- Status changed from New to Resolved

Ready for UAT

#2 - 21/02/2018 14:40 - Justine Legbedze

- File Maternal Off-study CRF entry_2018.02.21.pdf added
- File Maternal Off-study CRF_Yellow Screen Error_2018.02.21.pdf added
- Status changed from Resolved to Feedback

I UAT'ed the new off-study reason "maternal did not complete ANV1 visit" for PID 421-5 at 1000M on protocol v3. After saving the form, I received a yellow screen error. Attached are 2 screenshots of the CRF entry and yellow screen error.

#3 - 28/02/2018 10:45 - Leslie Kapaletswe

- Status changed from Feedback to Resolved

Issue resolved, please UAT.

#4 - 28/02/2018 21:57 - Justine Legbedze

- File IndexError at _admin_td_maternal_maternaloffstudy_add_.pdf added
- Status changed from Resolved to Feedback

I UAT'ed on the "redmine" test server and it worked fine; I was able to save the off-study CRF for PID 422-6 for "mother did not attend ANV1" reason. But my follow-up question is, should this also be working on the "protocol changes" test server? If so, I received another yellow screen error (see attached).

#5 - 06/03/2018 16:10 - Leslie Kapaletswe

- Status changed from Feedback to Resolved

The change applies for both servers, forgot to make a pull on the protocol changes server. Should be resolved now.

#6 - 13/03/2018 23:20 - Justine Legbedze

- File Add Maternal Off Study _ Django site admin_PID 403-1 (consented on v1 on protocol test server).pdf added
- File Add Maternal Off Study _ Django site admin_PID 421-5 (consented on v3 on protocol test server).pdf added
- Status changed from Resolved to Closed

I UAT'ed on the "protocol changes" test server and it worked fine. I was able to save the off-study CRF for PIDs 403-1 (consented on v1) and 421-5 (consented on v3) for "mother did not attend ANV1" reason. See attached screenshots for successful testing.

I also re-UAT'ed on the "redmine" test server with PID 414-5 and it worked fine.

Issue is closed now; ready for live server deployment.
