Description

Please add the EDC lab aliquot CSV to the biweekly CSV upload batch to Dropbox. We need to be able to identify all aliquots generated in the EDC, and I believe that this file will capture that. We currently receive a "td_lab_receive_20181004143611" file in the "non_crf" folder, but I'm not sure of the EDC source of this data.

- Status changed from New to Closed

Received CSV file last week.

As per our call today, DMC confirmed that aliquot CSV will be included in future batch uploads.

Closing ticket.
