Description			
On maternal visits schedules, visit 2360 appears before 2300. Kindly rearrange these visit schedules. However, i was able to add 2300 which comes after 2360 without any error message requesting that i completing previopus visit(2360).

Hi LESLIE, it seems this is inconsistent 'other PID' are fine while others are not, please see the following 0217-4, 0339-4, 0281-5, 2360 appears before 2300 on those (Maternal side)

Like we reported before this issue seemed inconsistent because the visits on some PIDS were in order while others were not.

BUT DURING TODAY'S UAT, ALL of the PID's I checked, their visits were well arranged including the ones above. so issue would be closed for now. If we come across the same issue in the future we would reopen the ticket.
