There are SOME missing manual requisitions:

##### \*FASTING GLUCOSE

Tube type: Grey Top, (leave the volume for now)

Section 6: Laboratory use only

##### \*SERUM STORAGE

Tube type: Red Top, 4ml

Section 6: Laboratory use Only

##### \*LEAD AND PLASMA STORAGE

Tube Type: EDTA (Leave the volume for now)

Section 6: Laboratory use only

\*CHEMISTRY (We are waiting for feedback from Terrence and Kate if we should list all the tests that are going to be done on this requisition- So we will give you feedback).

Tube Type: Red Top, 4ml

If you need samples for the above mentioned manual requisitions, I will ask Gosego to share them with you via skype, otherwise the format is the same as the ones you but different template names.

I have made some edits on the ones you shared, please go through each one of them.

On the delivery checklist-

1. Change study name to FLOURISH (BHP142)
2. Make 2 separate checklists- Maternal Delivery Checklist (CD4, VL) and Infant Delivery checklist (all samples other than CD4 and VL)

On the Sample manuals- remove extra 2 boxes on the PID section (CD4 and VL template) as discussed over skype call.

Font size is still small for the requisitions- can you make it the same as on the attachment below.

The box for stamp OR Initials of lab technician- is too long, it gets cut when printing.

Checklists- can you confirm with the lab about the Document No and the version. We are not sure if we are suppose to use the protocol version, kindly confirm with lab.
