Description

Add the following on home page of BHP archiving app:

1. Where we can view successful sent images

2. Where we can view finalized unsuccessful sent images

See attached how these were looking like in an old ODK app

SUGGESTIONS TO DO ON APP IF POSSIBLE

1. App versioning

2. Ability to update archiving application without a need to uninstall and install a new version. This is very important on scenarios whereby an old version application has stopped working and we have unsuccessful images on app.

testing app now showing what was sent and what failed to be sent.
To see what was sent or have failed, click a button next to a search button. See attached screenshot.

On suggestions above, DMC to keep exploring about what was suggested while in the meantime the new app can now go live.
