Description

Please fix the skip logic patterns for the kids cohort;

1. If retrospective, allow for 18 months for date of specimen collection to current date
2. If prospective, allow for 28 days/4 weeks from date of specimen collection to current date
3. Allow for ages > 1 month but <18 years of age.

REDCap currently does not allow for further entry for screening for kids because of the age restriction.
Please fix.
