Please fix the comments variables to align with the questions that are asked. If there is an option for free text after a question, it must be "2comm"

For example, I do not know what [ah_desc] and [nervous_desc] reference.

For comments please create the variable name to be the number of the question and then "comm"
for example, [2comm] or [56acomm] or [56bcomm]

Thank you!

Please see comment from 4 months ago - issue still persists.

I still do not see a CBCL combined export on admin on test server. Please address
